

ROMCOLOR 2000 SA Environmental Policy

ROMCOLOR 2000 SA commits to create an environmentally safe operating system for our processes and to reduce the greenhouse gas emissions for Rombest Masterbatches.

For achieving our goals we:

- Design, operate and maintain our processes inside our premises to prevent environmental pollution
- Design, implement, monitor and strive for continual improvements of Environmental System's performances by setting-up SMART targets for strategic, tactical and operational objectives and providing adequate resources for fulfilling those objectives
- Commit to reduce the environmental impact of owns operations, including the consumptions of energy, water and raw materials,
- Commit to reduce the environmental impact of owns operations, including the reduction of emissions, waste and wastewater output
- Identify and evaluate the risks and implement corrective actions for minimizing it
- Comply with all applicable legal requirements and other requirements set-up at Group level
- Ensure availability of effective crisis management and emergency response capabilities to respond to incidents and/or emergency situations at our premises
- Maintain an open and transparent dialogue with internal and external with an organization's interested parties in relation to the environmental topic area
- Strive for evaluating the cutting-edge technologies and implement those ensuring energy savings for final products
- Reduces the environmental impact by using renewable energy sources, through the operation of a photovoltaic park to reduce the carbon footprint
- Calculates and monitors the carbon footprint associated with the company's activities and communicates it to interested parties
- Regularly assesses energy efficiency and implements the recommended improvement measures

Politica de Mediu a ROMCOLOR 2000 SA

Romcolor 2000 SA se angajeaza sa creeze un mediu de operare a proceselor interne sigur pentru mediu si sa reduca emisia de gaze cu efect de sera pentru Masterbatches-urile Rombest.

Pentru atingerea scopului propus, compania:

- A proiectat, opereaza si mentine procesele interne pentru a preveni poluarea mediului
- A proiectat, implementeaza, monitorizeaza si se straduieste sa imbunataseasca continuu performantele sistemului de management al mediului prin asumarea unor obiective strategice, tactice si operationale de tip SMART si alocarea resurselor necesare indeplinirii acestor obiective
- Se angajeaza sa reduca impactul activitatii proprii asupra mediului, inclusiv consumurile de energie, apa si materii prime
- Se angajeaza sa reduca impactul activitatii proprii asupra mediului prin reducerea emisiilor, apelor reziduale si deseurilor
- Identifica si evalueaza riscurile si implementeaza actiuni corective pentru minimizarea acestora
- Se conformeaza cu toate cerintele legale aplicabile si alte cerinte asumate la nivel de grup
- Asigura disponibilitatea unui sistem de management al situatiilor de criza si capacitatii de raspuns
- Mentine un dialog deschis cu partile interesate interne si externe pe subiect de protectia mediului
- Se preocupa de evaluarea tehnologiilor de ultima generatie si implementeaza pe cele care asigura economie de energie productiei de masterbatches
- Reduce impactul asupra mediului prin utilizarea sursei de energie regenerabila prin operarea unui parc fotovoltaic pentru reducerea amprentei de carbon
- Calculeaza si monitorizeaza amprenta de carbon asociata activitatii companiei si o comunica partilor interesate
- Evalueaza periodic eficienta energetica si implementeaza masurile recomandate de imbunatatire
